

ASSIGNMENT -7

Introduction to MATLAB and study of different MATLAB commands

1. Explain the various categories of commands in MATLAB
2. What is command window and workspace in MATLAB
3. Explain the following commands with its purpose

Who	clear all	pwd	editpath	date
Whos	mlock	cd	copy file	ctrl-c
What	munlock	dir	mkdir	quit
Clear	home	ls	computer	exit
clear <var>	clc	path	clock	

4. Write the syntax & uses of the following functions with examples

- | | | |
|-------------|--------------|-------------|
| i. all | v. isinf | ix. isreal |
| ii. any | vi. isfinite | x. issparse |
| iii. exist | vii. isnan | |
| iv. isempty | viii. find | |

5. Write the syntax & uses of the following mathematical functions for arrays with examples

- | | | |
|------------|---------------|------------|
| i. exp | vii. abs | xiii. ceil |
| ii. log | viii. complex | xiv. mod |
| iii. log10 | ix. imag | xv. round |
| iv. sqrt | x. real | xvi. rem |
| v. nthroot | xi. fix | xvii. sign |
| vi. log2 | xii. floor | |
